Calligraphy Pads

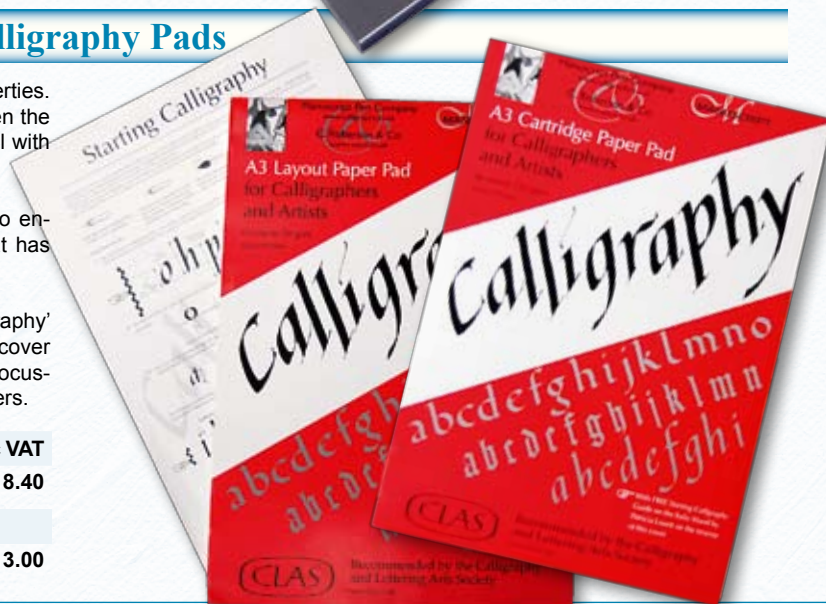

The best paper for calligraphy should possess two main properties. Firstly, to work well with the pen there should be a 'tooth' between the writing implement and the writing surface. Secondly, to work well with the ink the paper should be neither too absorbent nor too shiny.

The **calligraphy and Lettering Arts Society** is delighted to endorse these two new calligraphy pads which contain paper that has been tested and found to be the best available for the purpose.

Inside the front cover of the Layout Pad is a 'Starting Calligraphy' guide which looks at the Foundational Hand while inside the front cover of the Cartridge Pad there is a 'Starting Calligraphy' guide which focuses on the Italic Hand. These are useful for both tutors and Learners.

SCHMINCKE NEW SANSFIX

This versatile pastel paper with a light card backing and a subtle surface texture, is available in 6 colours. The tooth of this paper diminishes the need for fixative and frequently eliminates it. The surface is unique in that it permits the use of waterbased colours, acrylics and oils as well as pastels. Sansfix offers the highest standards of light fastness and is 100% acid-free.
